RETAIL CATALOGUE—JANUARY, 1929.

ALL PRICES PREPAID.

PLEASE READ BEFORE ORDERING.

PRICES in this catalogue are for Spring of 1929. For Fall of 1929, if you wish to order before our 1930 catalogue is out, you can use these prices and any reduction that the new catalogue shows will be refunded to you or additional bulbs added, as you wish.

SIZES. L. means Large, and size will be from 1¼ inch up. M. means medium, and size will be from ¾ to 1¼. S. means Small, and will be any size under ¾ inch.

QUANTITIES. Bulbs and bulblets are sold only in quantities as listed. If we quote "2 for 10c" we do not sell 1 for 5c. If bulblets are quoted "20c per 100" we do not sell 50 for 10c. TWELVE items of one kind and size will be sold for the price of ten.

MAIL or EXPRESS. We much prefer express for all orders of any size from wholesale list, as cost is less and bulbs are guaranteed against freezing or loss of any kind. Mail orders frozen are not made good by Post Office Department.

All our retail orders are sent prepaid, but if you mix wholesale orders in with retail and want them by mail, be sure and add enough postage to cover bulbs ordered wholesale. We will refund any excess you send. We cannot tell exact cost until after order is put up.

PREPAID POSTAGE. We pay postage anywhere in United States, Canada, or Australia.

R. F. D. customers should not ask for shipment during zero weather. Post Office will not insure against freezing. We take all risk if you let us start them out from here when we have weather around 20 degrees above zero, which we generally have at some time during every month of the winter season.

TERMS. We can not afford to fill orders of less than \$1.00. Please send cash with order from \$1.00 to \$5.00. On \$5.00 and over we will accept 25 per cent deposit and balance when you are ready for the bulbs. Bulbs are sent C.O.D. upon deposit of 25%.

POSTAGE STAMPS. We can only use 1c and 2c stamps and then only for the fractional part of a dollar. It is just as safe to put a dollar bill in the mail as postage stamps. Either money or stamps are sent at customer's risk. Drafts, checks, and money orders are at our risk and are perfectly safe.

SECOND CHOICE. As the season advances certain varieties are sold out. To the amateur we would suggest that they make a list of second choice or allow us to do so as we can always please you. To the old grower we dare not substitute as we might give him something he already has.

AMERICAN GLADIOLUS SOCIETY. This society now has a membership of around 6,000 from all over the world. The society gets out a monthly Bulletin devoted exclusively to Gladioli growing. You have the privilege of asking any question you wish through its columns and it will be answered. The Bulletin one year and membership costs \$2.00. Send money to Roscoe Huff, Secretary, Goshen, Ind.

CULTURE. The culture of gladioli is quite simple. Ordinary fertile soil is all that is required. Sandy soil is best and clay is poorest. Cultivation and water are the main helps in growing good glads.

TIME OF PLANTING. Plant in spring as soon as frost is out of ground. The large bulbs will come in bloom first and the smaller sizes later, so the bloom of a single variety extends over quite a period. Then we have the early and late varieties which also prolong the blooming period. We also plant some bulbs about every two weeks up to July first and in this way have blooms to sell from July first until killed by frost.

SIZES. No. 1 is 1½ inch up; No. 2, 1¼ inch to 1½ inch; No. 3, 1 inch to 1¼ inch; No. 4, ¾ inch to 1 inch; No. 5, ½ inch to ¾ inch; No. 6 ½ inch and less. Bulblets are the small bulbs that form around the base of the larger bulbs. These always come true to name with the parent bulb.

PLANTING. We dig trenches six inches wide for all sizes. Nos. 1, 2 and 3 are planted four to six inches deep, putting two rows in a trench in zig-zag shape. These are placed by hand with right side of bulb placed up. Nos. 4, 5 and 6 we sow in trenches about 2 to 3 inches deep regardless of position of bulbs. Bulblets are planted one inch deep and bottom of trench is covered with bulblets so that they entirely cover same.

The deep planting of large bulbs keeps wind from blowing them over after spikes have formed and also helps to hold moisture in dry seasons.

For field culture with the horse we have our rows 30 inches apart. This allows cultivator to cultivate the entire space by going once through. The rows must be straight. We always use lines in digging trenches.

CUTTING FLOWERS. Always cut flowers in morning when spikes are full of moisture. Spikes should be cut as soon as one or two flowers are open. Fill your vase with fresh water each day and cut one inch off the stems and you will have a nice bouquet for a week. The bottom flowers should be pulled off as they wilt. Always leave at least four leaves on plant in cutting. The main growth of the bulb and production of bulblets is after the spike is cut. Cultivation should not be neglected at this time.

DIGGING. We dig bulblets about September 1. They can be dug when still quite green. We cut the tops off close to the ground with a sickle and then use a long handle round pointed shovel and shovel dirt and all into a sieve. The dirt is then rubbed or shook through the sieve. The large bulbs are first loosened with a potato fork and then pulled up by hand and the tops broken off next to the bulb and the bulb and roots thrown into a tray six inches deep. Trays are then taken to cellar but windows are left open to give plenty of air.

STORAGE. After about two to three weeks from digging the roots and bulblets can be taken from the bulbs easily. After the bulbs are cleaned they can be put back in the trays but not over **FOUR INCHES** deep. Never store bulbs in same basement room with a furnace fire. If you have only up to a dozen bulbs of a kind you can use a 5-pound sugar sack nicely. Leave the top open. Temperature for winter should be between 35 and 40 degrees.

Exchange of Bulbs

We will take bulbs, No. 1 size, any variety and allow you \$2.00 per 100 in exchange for GALLANT LEADER, TROSSEAU PINK, RAVENNA CREAM or WHITE FOCH. Only one White Foch to a customer. Of the other three we can spare more.

If you wish to exchange write us first and tell us just what you have and how many you want of ours. You will have to send yours to us express or postage prepaid and we will do the same on the ones we send you.

We are the Introducers of the above varieties the reason we can make you this liberal offer. We do not wish to purchase any bulbs nor trade any other varieties.

MIXTURE

Turn to page 17 for prices on KUNDERD'S G L O R Y M I X T U R E and KUNDERD'S IDEAL MIXTURE. Page 19 for LUTHER BURBANK'S own MIXTURE. If you order Burbank's Mixture we know you will want to pick out some of them to grow separately until you get a stock of some of these wonderful varieties. Burbank's are all unnamed seedlings.

Our Mixtures we will sell you at \$15.00 per 1000 or \$1.50 per 100 either Prim Hybrids, Gandavensis, or the two combined. See wholesale list for prices of different sizes on our own mixtures. Twenty-five sold at 100 rate.

LUTHER BURBANK'S NEWEST HYBRIDS IN MIXTURE.

Read what he says in his January, 1926, Catalogue. "One hundred thousand absolutely new varieties of about every form and color ever produced from this wonderfully variable plant, including scarlet, crimson, yellow, blue purple, lavender, orange, salmon, and pink, with infinitely varied combinations of rainbow shades. Such a mass of various brilliant colors cannot be produced at many times the cost of these in any other flower. Every gladiolus bulb which I here offer originated on my grounds. For over forty years the Gladioli have been one of my specialties, and the foundation of some of the most popular strains originated with me decades ago. During the past few years wonderful new combinations of colors and shades never before seen in any flower except the tropical orchids have appeared in bewildering variety and abundance so that it is hardly possible to give them names, for the tender transparent orchid shades blend in endless poems of color."

"When you plant Gladiolus get the very newest and best if you desire to see what can be accomplished by forty years' rigid selection. Among these some really wonderful prizes will be drawn."

We have the above MIXTURE absolutely pure. Nothing but Burbank varieties in it. Purchased from him in 1926.

Japanese Irises

ASTARTE. Double, beautiful dark violet.

GEKKA-NO-NAMI. Earliest to bloom and the choicest white; very free. Glistening white with creamy white stigmas.

GOLD BOUND. A fine double, pure white, enriched by a creamy glow from the gold banded center.

HERCULE. Double, clear, lilac blue.

ISO-NO-NAMI. Double, soft blue, silvery veins.

PATROCLE. Single, superb dark reddish violet.

KOKI-NO-IRO. (Purple and Gold.) Enormous double flowers, often ten inches across; early and free blooming. One of the very best varieties. Color, rich violet purple with white petaloids, tipped violet. The conspicuous gold throat extends outward in sharp bluish white rays.

SKI-NO-RYO. Double, blue and white.

UCHIU. (Universe.) Beautiful, six-petaled flowers of largest size, on the longest stems. Color, cerulean blue with golden center and white. This variety covers the longest blooming season and is altogether one of the most attractive.

ZAMA-NO-MORI. Only three petaled, but larger than most; one of the daintiest and most delightful of the delicate toned kinds. White, with a heavy azure blue zone.

PRICES on all above Japanese Irises, 25c each. Six of one variety, \$1.25. All prices prepaid.

**AUSTIN'S INTRODUCTIONS
THE 1927 TRIO**

A \$100.00 BULB FOR \$5.00

Read Mrs. Austin's Letter Below

GALLANT LEADER (Austin). A new **LEADER** among the Glads and one of Mrs. Austin's best productions. "In the field the majestic spikes, with many massive bloom open at one time, presents an almost startling effect of beauty. The opening buds are peach-red blending into geranium red in upper petals, while the lower ones show a blotch of white slightly dotted Begonia Rose deep in throat. The spike is slender, straight, measures 64 inches in height, blooms 5 inches in diameter." Above measurements taken from stock grown on clay soil. Very prolific and a good seed bearer. Use this to impart vigor in your seedlings. Each, \$5.00. No bulblets for sale.

TROSSEAU PINK (Austin) Tall, graceful spike with well placed blooms of pleasing color difficult to describe. Tips touched Strawberry Pink blending to LaFrance Pink, deeper in throat with white blotch on lower petals, tinted maize yellow. A beautiful variety. Each, \$2.00. No bulblets for sale.

RAVENNA CREAM (Austin). Tips of bloom are clear maize yellow shading almost to white in upper petals, while lower ones are overlaid buff yellow, beautifully flushed Tyrian pink. A lovely combination of color, and a bloom of good size, and open form. Each, \$1.50. No bulblets for sale.

GALLANT LEADER	\$5.00

Dear Friends:

I wish to commend you for the manner in which you are introducing the varieties purchased from us, in that you are pricing them reasonably according to the quality and quantity, thus placing them within the reach of the average grower.

Reasonable prices lowered gradually mean service and profit to your customers and to yourselves. **GALLANT LEADER** would compare favorably with those in the \$100.00 row but glad you are making it only \$5.00.

Yours very truly,

MRS. A. H. AUSTIN.

We have purchased the entire stock of the above three varieties from the A. H. Austin Co. Send all orders to

WHITE FOCH

White Foch is a sport of Le Marechall Foch first found in our field by C. H. LeGron in 1925. We have never sold a bulb or bulbet or given any away so purchasers this year will be in on the ground floor. It is an exact duplicate of Le Marechall Foch in every way but color.

The editor of FLOWER GROWER says "Le Marechall Foch is undoubtedly the best and largest light pink Gladiolus ever originated." It was originated in 1919 and today without question is more largely grown than any other variety. White Foch is same size and pure white except a pin point dot of deep rose pink at base of each petal. So far all bulblets have come pure white without any throw backs. This variety is Registered with American Gladiolus Society under Certificate No. 1673.

We will only spare one bulb to a customer this year so you all have an even start. Bulbs will be one-half inch up. Price all sizes \$10.00 each. State size you wish when you order. The smaller sizes will produce more bulblets than the larger ones. See our page headed "Exchange of Bulbs."

LETTER HEADS AND ENVELOPES

We are just in receipt of two letters written on plain paper wishing to exchange Mother Machree bulblets at \$10.00 each and Jubilee bulblets at \$2.00 each for our Gallant Leader at \$5.00 each. Now if these men wish to dispose of stock as valuable as this they would inspire much more confidence in their would be Customer if they used Printed Return Envelopes and Letter Heads. See ad of Heyman & Stoeckle on another page. Not expensive. Try our suggestion.
